Visiting a museum is a rich experience that engages the visitor on multiple levels: cognitive, emotional, aesthetic. Aesthetic, engraving memories in visitors' hearts.

Artcharts is a conceptual yet intuitive map, made of durable felt, that serves this purpose as a unique souvenir.

This map uniquely captures and revives the memories of a museum visit, making it both aesthetically pleasing and personally meaningful.

Moreover the tactile characteristics of felt transform the static nature of the map — a simple object to be looked at — into something new that users can interact with.

Palomar is a design company founded in Florence, Italy in 2001.

The products we design and manufacture — a collection of nomadic objects — are radically innovative for the new meanings they aspire to bring to our everyday life and experience.

Through a research that can be described as “post-digital”, **every project designed by Palomar represents a sort of countermelody to the over-whelming digital technology mainstream**; a way of saying that new physical and analogic objects can coexist with the digital technology and its presumed imperatives, enriching our experience with a more human, more ironic and more attractive dimension.

THANK YOU!
