Our mission is to make our homes greener and more livable through plants, which provide numerous health benefits, reduce stress, and improve air quality. We aim to reconnect people with nature by offering products that help them enjoy it indoors.

We also support local production, promoting jobs and labor in Europe.

Together, we can create a more logical world.

# Home growing kit

With coffee as a substrate, we have created a kit through which you can grow your own mushrooms without leaving home. It's easy, fun and sustainable. The kit contains a sealed bag of oyster mushroom mycelium incubated on coffee grounds.

I'M NOT A NUT

GROWING KIT PEANUTS OPEN - WATER - ENJOY

**PEANUTS**  
*Arachis hypogaea L. Fabaceae*  
The ideal time for sowing is in winter and the optimal germination temperature is 10°C. To start growing, water the soil, crumpling it into the pot, introduce the seeds 2-3 cm into the soil and cover them with soil without applying any pressure. Keep the soil wet without flooding it. Your seeds will start to germinate after approximately 10 days, which may vary depending on the conditions. While the plants are young, do not expose them to direct sunlight. When the plants grow 10 cm high, transplant them, one by one, directly into the soil or to a 40 cm-diameter

# Crops of the Zodiac

With these kits you can grow different plants at their most appropriate time of year, although it is also possible to plant them indoors throughout the year.

Inside the kit you will find a seed bomb, a substrate tablet and a biodegradable germination pot.
